

WERELDWIJD PRIVACYNIEUWS
VAN DPO CENTRE

The DPIA is een beoordeling van de impact van de belangrijkste en bekendste kwesties op het gebied van gegevensbescherming uit de hele wereld. Het is niet het volledige verhaal, maar slechts een snelle samenvatting van 3 minuten, verzameld en samengevat om u op de hoogte te houden van het laatste nieuws in onze steeds veranderende branche.

Data protection checklist for mergers and acquisitions

In our latest blog, we explore data protection considerations for mergers and acquisitions (M&A) transactions. We cover how data protection compliance can affect deals, what buyers and sellers should consider, and provide a checklist of essential data protection documents.

Both buyers and sellers have responsibilities to ensure the right documentation is in place and that data protection governance is sound. This will build trust and mitigate risks, ultimately facilitating a smooth transition.

Dutch DPA fines Uber €290M for insufficiently protecting driver data

The Dutch Data Protection Authority (DPA) has fined Uber €290M after the taxi-service transferred the personal data of European drivers to the United States, violating the GDPR. The DPA said the data, which included taxi licences, location data, identity documents, payment details, and some medical data, was insufficiently protected.

The EU-US Data Privacy Framework (DPF) provides a set of rules and safeguards for transferring personal data between the European Economic Area (EEA) and the US. Our blog, **EU-US Data Privacy Framework: 3rd time lucky?**, explores the DPF and offers practical advice for organisations navigating international data transfers.

European Commission opens feedback on EU-US Data Privacy Framework

On 9 August 2024, the European Commission (EC) opened public feedback for the first review of the EU-US Data Privacy Framework. They invite individuals, organisations, public authorities, and other stakeholders to share their views until 6 September 2024.

The feedback will help the commission assess the effectiveness of the DPF, highlight any concerns, and guide future revisions to the framework.

Heir has right to personal data on Facebook, Dutch court rules

The District Court of Amsterdam has granted a deceased woman's heir access to her Facebook account. The woman had not made a choice about what should happen to her account after death, with her partner claiming full access in a recent court case. The court ordered Meta to provide the heir with access to the account and any data associated, with exception to the personal data of third parties.

The case sets a precedent for how digital assets are handled after death and highlights the need for clear policies.

The graphic is a promotional banner for the 'Privacy Puzzle Global Webinar Series' on October 15, 2024. It features a dark background with a grid of puzzle pieces. The central piece is white and contains the event title and date. Surrounding it are several pieces with cartoon avatars of speakers. On the left, there is text describing the series: '10 webinars - sign up for one or all', 'Get insights from leading DPOs and industry insiders on some of the complex privacy challenges faced by organisations today.', and a 'REGISTER NOW' button. At the bottom, there are time slots for different regions: '03:00 - 13:00 EDT | 08:00 - 18:00 BST | 09:00 - 19:00 CEST' and the 'dpc centre' logo.

ICO publishes report on PET adoption

A new report from the Information Commissioner's Office (ICO) highlights the challenges organisations face when adopting privacy-enhancing technologies (PETs). It summarises key barriers to PET adoption, such as legal uncertainty, a lack of technical expertise, high implementation costs, and inadequate understanding of the risks and benefits.

The report provides several recommendations to overcome these barriers, including:

- Training to increase awareness of PETs
- Developing cost-effective solutions
- Encouraging collaboration between PET developers and data-sharing organisations
- Advocating for support from funding bodies

- Detailed guidance from regulatory authorities on compliance

Canadian government introduces Connected Care for Canadians Act

The Canadian Minister of Health, Mark Holland, has introduced Bill-72, the Connected Care for Canadians Act. The Bill aims to accelerate the adoption of interoperability and data standards and will only apply to provinces and territories that do not have a similar legislation in place.

The legislation will enable a connected care system, in which health information can be accessed securely by patients and shared between providers when needed. It will also require all IT companies providing digital health services to adopt common standards, allowing for protected information exchanges across various systems.

Toyota confirms data breach involving 240GB of customer information

Automotive giant Toyota has confirmed a data breach after 240GB of customer information was leaked by hackers. The data included customer details, employee information, network infrastructure, and financial data. It is not yet known how or when the information was stolen, but Toyota said they are investigating the issue and will provide assistance to those affected.

Investing in measures to protect against data breaches is essential for all organisations, no matter their size. Our blog, **Data breaches – prevention is better than cure**, explores the different types of data breaches companies can face and provides effective mitigation measures against attacks.

Organisations must comply with Saudi's PDPL by 14 September 2024

The grace period for compliance with Saudi Arabia's Personal Data Protection Law (PDPL) is coming to an end and organisations have until 14 September 2024 to comply with this new legislation. Organisations have various obligations under the PDPL, including:

- Registering with the Saudi Data and Artificial Intelligence Authority (SDAIA)
- Implementing comprehensive data protection policies and procedures that align with PDPL requirements
- Conducting Data Protection Impact Assessments (DPIAs) for high-risk processing activities
- Informing data subjects of their rights and how to exercise them
